ORDER REGARDING CLAIM CONSTRUCTION

NOVEMBER 8, 2001

ZOBEL, D.J.

The parties have requested the Court to construe certain claim language in U.S. Patent No. 6,108,703 ("the '703 Patent"), U.S. Patent No. 6,003,030 ("the '030 Patent") and U.S. Patent No. 5.978,791 ("The '791 Patent"). Both parties have filed briefs offering suggested interpretations of the disputed claim terms, and they advocated their respective interpretations at a *Markman* hearing on October 25, 2001, held pursuant to the decision in Markman v. Westview Instruments. Inc., 52 F.3d 967 (Fed. Cir. 1995), affd 517 U.S. 370 (1996). Having reviewed the parties' arguments and considered the central claim terms at issue, I construe these terms as indicated below. In the interest of time, and given the parties' concerns regarding the trial schedule, I enter this claim

17

construction now without an explanatory memorandum. An accompanying memorandum will follow att a later date.

Construction of Terms im the '703 Patent:

"tagging"

providing a "pointer" or "hook" so that the object resolves to a

domaiin other than the content provider domain

"to resolve to a domain other than the content provider domain*

to specify a particular group of computers that does not include the content provider from which an optimal server is to be selected

resolving the ARL to identify a content server*

identifying an IP address for a specific content server in the

network using one or more DNS lookups

Construction of Terms im the '030 Patent:

"network

test performed by any entity on the "client" side of the network

traffic test" to evaluate traffic on the network

Construction of Terms in the '791 Patent:

"substantially unique identifier"

an identity for a data item generated by processing all of the data im the data item, and only the data in the data item, through

an algorithm

"using the identifier"

employing the unique identifier of the data item, with or without

other information, to carry out the recited function

At the time of the Markman hearing, the parties had abandoned a number of claims relating to the '791 Patent and did not appear to have a common understanding as to which additional claim terms were still in dispute. The parties' written and oral presentations offer little assistance in this regard. I therefore limit my ruling to the terms above.
